Professional Certificate Program in

API Automation Testing

Industrial Training with

Hands-On Learning That Prepares You for the Real World

Average Package: ₹8–28 LPA | Duration: 3–3.5 Months

Tools Covered

AI Tools

Projects

1. Education Portal Automation

Tools Used: Selenium WebDriver, TestNG, REST Assured, Jenkins, GitHub

Concepts: Functional Testing, API Validation, POM Framework

Major Topics: Course Management, Assessment, Report Validation

Description: Automate course creation, exam submissions, and API validations for an e-learning system integrating REST endpoints and UI workflows.

Scope: Covers UI + backend automation for real-time student/teacher dashboards.

Who Should Do: Manual testers or working professionals upskilling in automation.

Prerequisites: Java, REST Assured basics.

Experience Gained: POM + TestNG + CI/CD implementation.

Trending Technologies: REST API, Jenkins CI pipelines.

2. Logistics Management System

Tools Used: Selenium, REST Assured, TestNG, Jenkins

Concepts: API Regression, Parallel Execution, CI/CD

Major Topics: Order Tracking, Shipment Processing, Inventory APIs

Description: Build an automated suite for shipment, tracking, and inventory validation using REST Assured for API and Selenium for dashboards.

Scope: Real-world B2B logistics flow automation.

Who Should Do: Mid-level QA Engineers.

Prerequisites: Core Java, TestNG.

Experience Gained: API validation + GitHub integration.

Career Outcome: Test Automation Specialist.

Trending Technologies: Hybrid Framework + Git branching.

3. E-Commerce Platform Testing

Tools Used: Selenium, TestNG, Postman, Jenkins, GitHub

Concepts: Cross-Browser, BDD Automation

Major Topics: Cart, Checkout, Payment, Reviews

Description: Automate end-to-end buyer journey (UI + REST API) for cart, checkout, and order confirmation.

Scope: Full-stack test integration.

Who Should Do: QA Engineers with Selenium knowledge.

Prerequisites: Java OOPs, DOM, API basics.

Experience Gained: BDD with Cucumber.

Career Outcome: QA Automation Engineer.

Projects

4. Banking App API Automation

Tools Used: REST Assured, Postman, Jenkins, TestNG

Concepts: Token-Based Authentication, Security Testing

Major Topics: Account Management, Transactions, KYC APIs

Description: Automate account creation, fund transfer, and verification APIs with secure token handling.

Scope: FinTech API automation and response validation.

Who Should Do: QA Automation Testers.

Prerequisites: REST API methods, JSON handling.

Experience Gained: Secure API and JWT testing.

Career Outcome: API Automation Engineer..

5. Healthcare Appointment Automation

Tools Used: Selenium, TestNG, REST Assured, Jenkins

Concepts: End-to-End Workflow Automation

Major Topics: Appointments, Billing, Reports

Description: Automate patient scheduling, doctor dashboards, and REST health-record APIs.

Scope: Integration of UI + API validation.

Who Should Do: Professionals targeting healthcare domain QA.

Prerequisites: Java, Maven setup.

Experience Gained: Hybrid Framework + BDD.

Career Outcome: QA Automation Lead.

Trending Technologies: Jenkins + Cucumber.

6. Travel Booking System

Tools Used: Selenium, REST Assured, TestNG, GitHub

Concepts: Workflow Automation, Parameterization

Major Topics: Flight, Hotel, Payment

Description: Validate travel search results, booking APIs, and payment endpoints with Selenium & Rest Assured.

Scope: Full functional coverage of travel lifecycle.

Who Should Do: Intermediate automation learners.

Prerequisites: Core Java + TestNG.

Experience Gained: Data-Driven Framework usage.

Career Outcome: QA Analyst.

Trending Technologies: REST + Jenkins pipeline.

Projects

7. Social Media App Testing

Tools Used: Postman, Selenium, TestNG

Concepts: API Chain Validation, Performance Testing

Major Topics: User Login, Posts, Likes, Comments APIs

Description: Automate user registration, post creation, and social interaction APIs.

Scope: API-level functional and load validation.

Who Should Do: Intermediate testers.

Prerequisites: JSON response parsing.

Experience Gained: Postman + Rest Assured suite.

Career Outcome: API Tester.

8. Payroll Management System

Tools Used: Selenium, REST Assured, TestNG, GitHub

Concepts: Data-Driven Framework, CI Integration

Major Topics: Salary, Employee, Attendance APIs

Description: Automate employee payroll calculations and API validation through Selenium & TestNG.

Scope: Back-office HR automation.

Who Should Do: QA working on enterprise tools.

Prerequisites: Java Collections, Excel Data Provider.

Experience Gained: Jenkins + Maven CI builds.

Career Outcome: Senior QA Engineer.

Trending Technologies: Jenkins CI/CD.

9. Food Delivery Application

Tools Used: Selenium, REST Assured, Postman, TestNG

Concepts: API Automation, End-to-End Integration

Major Topics: Orders, Payments, Ratings

Description: Automate restaurant and order management modules (UI + API).

Scope: Mobile + web testing integration.

Who Should Do: Automation Test Engineers.

Prerequisites: REST methods, Selenium basics.

Experience Gained: JSON Schema Validation.

Career Outcome: API Automation Engineer.

Trending Technologies: Continuous Deployment.

Projects

10. Job Portal Automation

Tools Used: Selenium, TestNG, GitHub, Jenkins

Concepts: Regression, Page Object Model

Major Topics: Job Search, Apply, Admin Panel

Description: Automate recruiter and candidate workflows using POM framework.

Scope: Cross-browser regression suite.

Who Should Do: Beginner QA professionals.

Experience Gained: Selenium + TestNG + Reports.

Career Outcome: Automation Analyst.

Trending Technologies: TestNG Parallel Execution.

11. CRM System Testing

Tools Used: REST Assured, Jenkins, GitHub

Concepts: API Integration, Regression Testing

Major Topics: Customer, Leads, Pipeline APIs

Description: Automate CRM APIs for lead generation, update, and reporting.

Scope: REST API regression suite.

Who Should Do: Working professionals in QA.

Experience Gained: CI/CD + Git branching.

Career Outcome: API Engineer.

12. Learning Management System

Tools Used: Selenium, TestNG, Maven

Concepts: Functional Automation, POM Framework

Major Topics: Login, Assignments, Reports

Description: Automate student dashboard and backend data verification.

Experience Gained: TestNG XML Suite execution.

Career Outcome: QA Engineer (LMS domain).

Trending Technologies: Excel-driven data testing.

Projects

13. Online Banking UI Automation

Tools Used: Selenium, TestNG, Jenkins

Concepts: Cross-Browser Testing

Major Topics: Fund Transfer, Statements

Description: Automate login, fund transfer, and report modules with parallel execution.

Scope: Retail banking web app.

Experience Gained: TestNG Parallel Testing.

Career Outcome: QA Analyst.

Trending Technologies: CI with Jenkins triggers.

14. Insurance Claim API Testing

Tools Used: Postman, REST Assured, Jenkins

Concepts: Response Validation, Schema Assertion

Major Topics: Claim, Policy, Payment APIs

Description: Automate policy claim and payment APIs with security validation.

Scope: Backend insurance API testing.

Experience Gained: JSON/XML handling.

Career Outcome: API QA Engineer.

Trending Technologies: BDD + REST.

15. Chat Application Automation

Tools Used: Selenium, REST Assured

Concepts: WebSocket API Testing

Major Topics: Messages, Notification APIs

Description: Automate message exchange and delivery confirmation APIs.

Experience Gained: Real-time API testing.

Career Outcome: QA Specialist.

16. Retail POS Automation

Tools Used: Selenium, TestNG, Jenkins

Concepts: Functional & Integration Testing

Major Topics: Sales, Billing, Report Generation

Description: Validate POS operations and backend billing APIs.

Experience Gained: Data-Driven Test Framework.

Career Outcome: QA Automation Lead.

Placed Students Review

Student Review — Pawanpreet Singh (Placed at TSYS | 18 LPA)

"UnCodemy has been a game-changer in my career journey. The mentors explained every concept from the basics, making complex topics easy to grasp. Their continuous guidance and real-time project experience helped me boost my confidence and technical skills.

I'm truly thankful to UnCodemy for helping me secure my position as an Associate Senior Software Engineer at TSYS."

Student Review — Gunjan (Placed at Infosys | 16 LPA)

"Being a part of UnCodemy was a life-changing experience. The trainers provided not only in-depth technical knowledge but also real-world insights that strengthened my foundation. The constant guidance from mentors and the placement support team helped me polish my interview skills and stay confident throughout the process.

I'm truly grateful to UnCodemy for helping me secure my dream role as a Quality Engineering Lead at Infosys. It's been an incredible journey of learning and growth!"

Student Review — Abhinav Pandey (Placed at DXC Technology | 16 LPA)

"Joining UnCodemy was one of the best decisions of my career. The mentors provided great hands-on training and the placement team guided me through every step, helping me land my role as an Automation Test Engineer at DXC Technology.

Grateful to UnCodemy for their support and guidance!"

Student Review — Sahil Siddique (Placed at Hewlett Packard Enterprise | 14.5 LPA)

"UnCodemy played a key role in shaping my IT career. The practical training, real-world projects, and mentor support gave me the confidence to excel. The placement team guided me throughout the process, helping me secure my role as an Automation Tester at Hewlett Packard Enterprise.

Truly thankful to UnCodemy for this incredible opportunity!"

Placed Students Review

Student Review — Ravi (Placed at Virtusa | 14 LPA)

"Uncodemy helped me turn my learning into a rewarding career. The mentors made every concept clear with real-time examples, and the placement team supported me throughout the interview process. Their guidance and practical training prepared me perfectly for my role as an Automation Tester at Virtusa.

Thank you, Uncodemy, for making this achievement possible!"

Student Review — Thiruchenthil Y (Placed at TVS Digital | 13 LPA)

"Uncodemy played a major role in shaping my career. The trainers provided in-depth knowledge and practical exposure to real-time projects, which boosted my confidence. The placement support was exceptional — they guided me through every step of the process.

I'm thankful to Uncodemy for helping me secure my position as a QA Engineer at TVS Digital."

Student Review — Rekha (Placed at LTIMindtree | 13 LPA)

"Uncodemy has truly transformed my learning experience. The mentors provided hands-on training and deep insights into real-world ETL testing. The placement support was exceptional — from guiding me in resume building to helping me prepare for interviews."

Student Review — Vivek Tripathi (Placed at Zensar Technologies | 12.5 LPA)

"Uncodemy played a vital role in helping me build a strong foundation in automation testing. The mentors provided excellent guidance, and the practical sessions made complex topics easy to understand.

The placement team was highly supportive — from interview preparation to final selection. I'm thankful to Uncodemy for helping me land my role as an Automation Tester at Zensar Technologies!"

I was searching for a good **API Testing** course online and found Uncodemy. Even though I live in Delhi, I preferred to study from home. The classes were well-organized and easy to follow. I've learned Postman, REST API basics, and test automation. Thanks to the course, I now feel confident about switching to an automation testing role.

My experience with Uncodemy's **API Testing** course was really good. I attended all sessions online while staying in Delhi. The trainer was excellent and made the tough topics easy to understand. I practiced a lot using tools like Postman and got better every week. I'm very happy with my learning.

When I decided to upskill in **API testing**, I had no idea where to begin. That's when I came across Uncodemy, and it turned out to be a great decision. The course was well-structured and covered everything from the basics to advanced-level automation with tools like Postman and REST Assured. What I appreciated most was the hands-on practice and real-time projects that helped me gain confidence. By the end of the course, I was not just learning—I was job-ready. I'm now placed and working on live API projects

I'm from Pune and took the **API Testing** course online from Uncodemy. The classes were very clear and easy to follow. Even though it was online, I never felt disconnected. The trainer explained everything with examples and gave us practice tasks after every session. This course helped me build confidence in **API testing**, and I'm now ready to start working in this field.

My name is Sakshi Sharma and I chose Uncodemy for the **API Automation** course, and I'm glad I did. The classes by Satyendra Sir were very interactive, and he made sure every student understood the concepts properly. The course helped me improve my skills, and the placement team guided me well. I've now started my career in automation testing, thanks to Uncodemy.

Looking back, the decision to take the **API Testing** course at Uncodemy was a turning point in my career. I had some manual testing experience but wanted to switch into automation, especially **API testing**. This course gave me the knowledge and practical exposure I was missing. From understanding how **APIs** work to writing test cases and using tools like Postman and Swagger, everything was covered in depth. Now, I feel confident handling automation tasks in my job.

Before joining Uncodemy, I was struggling to get a job because I lacked technical skills in **API testing**. This course changed that. The training was clear, structured, and full of practical use cases. What really helped me was the way the concepts were explained—step by step, with examples. It gave me the confidence I needed, and today, I'm finally working in the IT industry. I'm so thankful for this opportunity and for the people who helped me reach this point.

I wanted to learn **API testing** to enhance my testing profile, but I didn't want another boring theory-heavy course. Luckily, Uncodemy delivered exactly what I needed. The sessions were practical, the tools were taught clearly, and every doubt I had was addressed in detail. Even though it was an online course, it felt like a proper classroom. After completing the training, I got support with resume building and interview prep too. I would definitely recommend this course to anyone looking to grow in the testing field.
